

**I deliver your products end to end,
with AI in the product and in the team.**

A developer since 2019, I design complete SaaS products, from the frontend to production. I set up AI-agent-driven development in teams, from ticket to merge: repository instructions, skills, review, reliable CI and tests, under human supervision.

Deltarm

HEAD → main

since Jan 2026

Senior fullstack developer · AI agents [#cac40](#) [#grc](#) [#ai-agents](#)

- A governance, risk and compliance (GRC) platform for CAC 40 groups, in a team of six developers.
- AI used intensively and openly: for each ticket, agents implement, review and test, under technical and product supervision. In six months, the team delivered the equivalent of more than three years of a conventional team's work (a conservative estimate).
- My contributions: CI reliability, the agents' skills (PR review, fixing review findings), their working rules (review by an AI, human acceptance testing, no auto-merge) and business features.

DeepDetective

May - Oct 2025

Fullstack & AI developer #investigation-game #conversational-ai

- For an investigation board game with a companion app, the AI that lets players talk with the characters.
- Several LLM providers with automatic fallback, RAG on the scenario, streaming, characters written in Notion and synced.
- As the sole developer, I also took over and hardened the app: data security, player progress, performance.

stack › LLM · RAG · streaming · Notion API

SecOps Forces

since Mar 2025

Fullstack developer · sole developer of the application #cybersecurity #saas #solo

- A SaaS platform that protects SMEs and mid-size companies: email and domain security, phishing, vulnerability monitoring, continuous Microsoft 365 audits (CIS, CISA).
- An AI assistant, based on Mistral, that answers from each organisation's security data.
- React front and back office, multi-tenant .NET API, Stripe billing, more than 3,000 automated tests up to Playwright user journeys.

stack › React · TypeScript · .NET · Stripe · Mistral · Playwright

Ynov Campus · IPSSI

since Oct 2022

Master's teacher in computer science #teaching #masters

- At Ynov Campus Sophia-Antipolis since 2022, and at IPSSI in 2025: AI-agent-driven development, AI integration, fullstack web development, software testing, algorithms and Web3.

Smart-Chain

Oct 2022 - Sep 2024

Fullstack developer, Web3 & AI #web3 #ai #startup

- A Paris startup in blockchain and AI: several products, including one for the French Atomic Energy Commission (CEA).
- Web apps connected to blockchains (smart contracts, indexing, IPFS), to in-house computer vision and tabular-data models (CNN, GAN, ViT, LSTM) and to LLMs (OpenAI, Mistral AI: assistants, fine-tuning, RAG).

Ricardo tag: masters-2022

Oct 2020 - Oct 2022

Frontend, then backend developer · work-study #1st-swiss-marketplace #english-speaking

- The first marketplace in Switzerland, in an English-speaking company, with Scrum.
- One year on the frontend, then one year on the backend, on Kubernetes microservices. A tool for frequent sellers brought in CHF 1.6 million in annual revenue.

stack › React · TypeScript · Redux · Java Spring · .NET · Kafka · Kubernetes

Infotel tag: bachelor-2020

Oct 2019 - Oct 2020

Java & machine learning developer · work-study #machine-learning #european-patents

- Desktop software that retrieves metadata from European Patent Office documents with machine learning (CRF), and software architecture learnt by pair programming with my mentor.

stack › Java · Swing · CRF

First commits tag: simplon-2019

before 2019

Self-taught, then Simplon

- Web development learnt on my own, then the French professional title of Web and Mobile Web Developer at Simplon, in Cannes.

Alexandre Phez

#proactive #autonomous #reliable

Co-founder of DeepDetective · client · 2025

Efficient and highly autonomous work, reliable on quality and deadlines: a major backend overhaul before the app went live, and clean code.

Massinissa Hamidouche

#proactive #versatile #team-spirit

VP Engineering at Smart-Chain · direct manager · 2025

Two years of high-quality code under tight deadlines, from dApps (EVM, Tezos) to AI (CNN, ViT, RAG), and knowledge shared with the team.

Irene Renggli

#impact #initiative #team-spirit

Product Manager at Ricardo · product team · work-study

A tool for frequent sellers that brought in CHF 1.6 million in annual revenue, the optimisation of promotions and an onboarding checklist.

Raed Chamam

#volunteer #work-ethic #curious

Senior Software Engineer at Ricardo · colleague · 2021

Always the first to volunteer for projects, never backing down from complicated topics.

Jeremy Pekmez

#autonomous #ddd #tdd

Senior Member of Technical Staff at Cohere · trainer at Ynov · 2024

ASP.NET projects taken from design to deployment on Kubernetes, first steps in DDD and TDD, and knowledge sharing.

Sébastien Gilabert

#deep-learning #innovation #communication

CEO of Neural Vision · deep learning teacher · 2024

A CNN that reads handwritten digits and solves calculations live on the web, and clear communication.

Serge Benayoun

#dynamic #curious #demanding

Project lead at Infotel · work-study supervisor

Curiosity, energy and a constant search for improvement, from the code to oral presentations.
